

SHAWNEE MISSION
SCHOOL DISTRICT

June 21, 2019

Dear Board of Education Members,

It is with great excitement and deep pride in our community that I am informing you that the strategic planning process you commissioned in January is complete. With this document, I am recommending approval of Shawnee Mission School District's strategic plan, which builds upon the previous five-year strategic plan, and will govern the district's work through 2023-24. Over the last five months, our community has engaged in thoughtful work, which has led to the development of a road map which will guide our work for the next five years and beyond.

The recommendation for approval of this strategic plan is done with several assumptions. It is critical to state these assumptions publicly. They are as follows:

- 1) All expenditures presented in this plan are subject to the normal budgetary process, and must occur in the context of careful fiscal planning. This includes the examination and reallocation of existing resources when possible, as well as the development of a clear plan for sustainable funding sources for expenditures which were not anticipated in the current budget. Normal budgetary processes include the approval of expenditures by the Board of Education; therefore, approval of the plan commits to the study of the action steps presented, not a de facto budgetary commitment the district cannot meet or sustain.
- 2) The plan will be implemented in phases. While all work defined in the plan is important, we must take the long view and ensure the action steps are completed with high fidelity, and at a manageable pace. Our goal is to achieve quality outcomes as defined by the three objectives, and to avoid the temptation of simply checking items off the list.
- 3) Successful implementation of the plan requires community engagement and collective staff commitment to achieving the three objectives. Work by district committees and task forces, site councils and building improvement teams must focus on achieving the three objectives. It requires a commitment to evidence-based measurable outcomes that inform continuous improvement. Most importantly, our collective focus must be on students. The plan states our commitment to creating learning opportunities that help our students develop a personalized learning plan. This plan informs their journey to college and career readiness, and supports the development of strong interpersonal skills which lead to life success.

The approval of this recommendation brings with it a series of next steps. Some of the action steps require immediate attention. Others will involve district level groups that work on specific actions in clearly defined ways. Some of those groups already exist and others may need to be formed. Work will take place in July and August to iron out details on implementation of the plan, and will be shared at Board of Education meetings. That sharing of details will keep the Board, staff and community up-to-date on the strategic plan. Program evaluations will be included in the updates, where we will report on measurable outcomes related to the objectives and associated action steps.

Shawnee Mission has a proud tradition of excellence and this plan is designed to build on the past to create an even better future.

With gratitude,

A Message from Superintendent Mike Fulton to the Shawnee Mission School District Community

Schools exist to prepare students for their future. That happens best when caring adults come together to support student success. This strategic plan reflects a commitment by our Shawnee Mission School District (SMSD) community to support student success in their learning journey. The plan serves as a road map, giving clarity to our destination and the pathway to get there.

Our strategic plan is the result of a process commissioned by the Board of Education and implemented by planning teams that involved approximately 180 individuals, including students, parents, staff and community members. Supported by a consultant with expertise in preK-12 strategic planning, groups worked from February through June 2019 to develop a set of beliefs, a mission statement, parameters for the work, objectives, strategies and specific action steps.

Strategic plans are often long and complex, resulting in a document that simply sits on a shelf. Our SMSD strategic plan is designed to be a public document that is known and used by all stakeholders. It is a living document which will have mile-markers added to provide on-going feedback to our SMSD community on progress made toward achieving our objectives. It is a plan that lives in our hearts and prioritizes daily work.

Strategic planning is aspirational in nature. Its purpose is not to document who we are, but rather to give voice to who we want to be through a small number of clearly articulated objectives. This plan emphasizes our belief in the importance of personalized learning plans, college and career readiness and the importance of interpersonal relationship skills in daily life. These objectives apply to ALL students, with an expectation of inclusivity. The objectives are supported by a set of interconnected action plans, creating a wholistic approach to district and school improvement. This approach allows us to avoid the tyranny of the urgent or the pursuit of shiny objects that detract from achieving our objectives. We are empowered to engage in this work with a set of beliefs and clearly defined parameters which support student academic success. This can and must be done in an environment where we intentionally seek to create a high quality, diverse workforce that reflects all of who we are as a community.

Achieving our objectives requires a clearly-defined curriculum with evidence-based instructional strategies and assessments which support students in monitoring and understanding their learning growth. It also requires the timely and effective use of data within defined processes that support action planning at the school, feeder system and district levels. Beginning in the fall of 2019, Site Councils and Building Leadership Teams will be trained on their roles in this process. Regular updates on key aspects of planning, including both quantitative and qualitative data, will be provided at Board meetings according to a published calendar. Once approved, all work in the district will focus on achieving the three objectives within the context defined by the Strategic Plan.

I am grateful to the thousands of individuals who have given their ideas, voice, expertise and time to this process. It is clear this is a strong community, committed to focusing on what is best for students' success in life. Now, we continue the process of building on our legacy of excellence. Together, we will make the Shawnee Mission School District an even better place for each child to live, learn and grow.

District Steering Committee

The district steering committee is comprised of approximately 30 district stakeholders representing both the school and district communities. This committee, representing a broad range of stakeholder groups (parents, students, classified and licensed staff, PTA representatives, business leaders, community services, etc.) and representative of the district’s demographic profile, is responsible for implementing the strategic planning process, including:

- Overseeing the work
- Developing a mission, beliefs, objective, strategies and parameters
- Supporting continuous improvement

Steering committee members serve with defined term limits and meet as needed but at least annually.

BELIEFS:

- Every individual has inherent worth and deserves to be valued and celebrated.
- A community's strength is derived from its diversity.
- Respecting a community's diversity and each individual's dignity demands equitable access.
- A thriving community meets the basic physical, social, and emotional needs of its members.
- Safe and caring relationships are essential for learning and growth.
- Acknowledged and appreciated individuals confidently engage and collaborate.
- Individuals of all abilities and experiences can achieve personal excellence.
- Ownership empowers each person to ignite their future.
- Effective communication is truthful, genuine, reciprocal, and respectful.

MISSION:

The mission of the Shawnee Mission School District, the bridge to unlimited possibilities yet to be discovered, is to ensure students construct their own foundation for success in life's endeavors through relevant, personalized learning experiences orchestrated by talented, compassionate educators and distinguished by:

- an inclusive culture
- an engaged community
- and robust opportunities that challenge learners to achieve their full potential.

OBJECTIVES:

Every student will achieve academic success through a challenging, relevant personalized learning plan.

Every student will develop and utilize personal resilience while mastering essential competencies that lead to college and career readiness.

Every student will develop interpersonal skills to be an engaged, empathetic member of the local and global community.

STRATEGIES:

We will reimagine teaching and learning to guarantee relevant opportunities for personalized learning experiences.

We will relentlessly create a fully unified, equitable, and inclusive culture.

We will create the climate to cultivate quality educators so they flourish in pursuit of our mission.

We will design systems that support our mission and beliefs.

We will strategically focus resources to support state-of-the-art facilities to accomplish our beliefs, mission, and objectives.

PARAMETERS:

We will make decisions with primary focus on what is best for our students' success in life.

We will honor our diversity and treat each person with dignity and respect.

We will practice responsible stewardship of all our resources and partner with our community to leverage success.

We will not compromise our commitment to academic excellence.

We will recognize and incorporate our traditions of excellence, and build our vision for the future upon their solid foundation.

Action Teams

These teams (25-30 people) worked on the identified strategies to establish action plans as well as costs associated with these plans. These plans are reflective of current and projected resources available to the District and are fiscally responsible and sustainable. These teams were appointed by the superintendent. Action team memberships included community volunteers, building and district level leadership team members, teachers, classified staff, site council members, students and parents. Action team recommendations were presented to the district steering committee. Work by the action teams supported meeting the requirements of the Kansas Education Systems Accreditation (KESA) process, which include:

- Academic Readiness - Kindergarten Readiness, High School Readiness, College/Career Readiness
- Student Success
- Facilities
- Connecting Community
