## THE WORLD

A look at how COVID-19 is impacting countries worldwide in numbers (as of March 25, 2020)

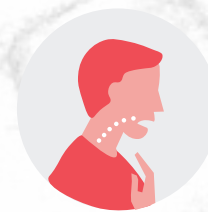

## THE SYMPTOMS

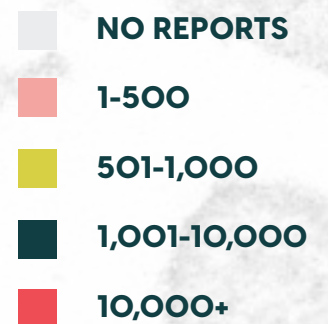

A SPIKE IN TEMPERATURE

DEVELOPMENT OF A COUGH

A SHORTNESS OF BREATH

## THE END

- 1 THE VIRUS WILL SLOW DOWN WITH WARMER WEATHER**  
COVID-19 thrives in 50-70 degree weather. Doctors and scientists predict the virus will decrease during the summer months.
- 2 EVERYONE WILL GET SOME FORM OF THE VIRUS**  
Some scientists believe that everyone on Earth will get COVID-19, in some form, and some people won't even realize it.
- 3 A VACCINE MAY BE CREATED, AND ACCESSIBLE IN 12-24 MONTHS**  
There's a hope that a vaccine will be discovered. If one were to develop, it would be a year or two before it is easily accessible.
- 4 VIRUS SURVIVORS WILL BE STUDIED TO FIND NATURAL IMMUNITIES**  
Doctors will study the DNA of recovered COVID-19 patients to try and duplicate the antibodies that helped fight off the virus.

## THE SPREAD

COVID-19 IS SPREAD THROUGH:

**1: UNCOOKED MEAT**  
The way the virus began

**3: PHYSICAL CONTACT**  
The easiest way to spread the virus

**2: SHARING DRINKS**  
The fastest way to spread the virus

**4: TOUCHING YOUR FACE**  
The easiest way to infect yourself
