clover & jade achen

Seniors Clover Tyler and Jade Achen are close friends whose love for art brought them together

SUPPLY

A few of the girl's favorite art supplies they can't live without

white gelly roll pen — white gel pens used to add dimension into pieces

hoo hoo markers — alcohol based markers that are easily buildable and layer easily

kuretake watercolors — easily portable watercolors used for sketch and illustration

when and why did you start creating?

jade "I started when I was younger and never really let go of it. I got more serious about it in high school because I was freaking out about a future career."

"I started when I was probably two or three because my dad is an artist and we already had art supplies around... I just never really stopped."

clover

what is your process when creating?

jade "I'm the opposite of [Clover]. I almost always have an idea, and then I make a bunch of sketches, and refine them. I do this so I can make just one piece."

"Most of the time, it's a mess. I just start... there's a lot of switching things around. I'm not very organized in my art process, it's a lot of chaos."

clover

what is your primary medium?

jade I really like watercolor. It's the first medium I really got into and I stuck with it. It can be super detailed or super fuzzy.

I have always drawn. I love drawing... I also like to sculpt because it never turns out how you expect.
