WHAT'S YOUR FAVORITE SHARK?

THE ANSWER CHANGES all the time. A lot of the time I'd like to say, "The one I'm in the water with," but honestly I think for right now the Great Hammerhead because they're unique looking and so, so endangered.

WHY DO YOU LOVE SHARKS SO MUCH?

THEY'RE REALLY MISUNDERSTOOD. People fear them almost irrationally. The amount of encounters with sharks and humans is really low compared to other things that kill people.

DO YOU THINK THERE IS A STIGMA AGAINST SHARKS

HONESTLY, THE MOVIE "JAWS," I think that kind of gore is in our cultural subconscious and so whenever people think the word shark, all they see is the blood in the water and people screaming.
